If you are looking for proven depth of pedigree and actual pedigree carcass results then this is the sire. GRSFN0895 is a son of GRSFK0483, whose first 11 carcass progeny have seen 8 * MS9 results and ranks 7th on the Mayura marbling sire list (May 19). N895 is a large sire himself and his dam PMGFC0133 has 2 * MS9 carcasses and a MS 7 steer progeny. I expect GRSFN0895 to sire good frame progeny that have excellent marbling given his proven pedigree for results.

Free of all recessive genes.
